In your experience with group problem solving, what can make it challenging?
and what are some of the things you hope ARE NOT part of your Hackathon team dynamic?

- passive attitude
- Overcontrol the group
- People talking over others
- Miscommunication
- Broad topic
- competition
- disrespect
- team members not carrying their weight
- disorganization
- not dedicated to the process/other job distractions
- Take over personality
- Lack of motivation
- Don't put the same effort as mine
- non-constructive criticism
- One sided decisions (again).
- One-sided decisions.
- incompatible personalities
- Hesitation to share
- Competition within the group vs supportive learning together
- Not respecting work-life balance
- Conflict, unorganized, competition between team members
- Analysis Paralysis
- Members not speaking up with their ideas
- A lack of patience
- Someone trying to control the whole group
- Self heroism
- Conflicts of different type
- Group members feeling stifled due to virtual nature of the hackathon
- Conflicting opinions
- Collective fatigue of virtual setting
- lack of clarity / miscommunication
- Poor listening
